

Joint Learning Platform

The Joint Learning Platform (JLP) is a complete e-learning solution for the entire local health and social care community and beyond. It allows training departments to recover costs and generate income from online sales.

From a single web page, organisations can provide 24/7 access to e-learning courses which cover mandatory / compliance training together with a host of high-quality CPD courses and QCF courses.

The JLP is the obvious solution for any organisation that places a high value on the training services they provide and wish to recover the costs.

The benefits

- Generate income from high quality learning resources
- Reach a wider national and international audience
- Off-the-shelf solution ready to be implemented
- No large up-front investment
- No lengthy or lock-in contracts to sign up to
- Easy to use and administer

Adaptable

Bespoke content can be created for your JLP, including m-learning materials delivered to learners' mobile phones. Individual organisations or clusters of organisations can have their own courses built or imported.

How does it work?

- Step 1 . We set you up with a branded web portal for you and your partners/clients with access to around 40 online courses
- Step 2 . You market the courses to your partners/clients in the NHS, local authorities, third sector and private sector
- Step 3 . Your partners/clients purchase the courses from you
- Step 4 . Your partners/clients log in and enrol on the courses they wish to complete.
They download their certificates on completion.

Secure

All data is stored securely on state-of-the-art servers, with learner information available for import to your HR systems for integration with payroll, training or other software packages.

There are no hidden costs or expensive renewal fees. The entire suite of courses can be made available to your partners/clients at the click of a mouse.
